MUHAMMAD HASNAIN

SOFTWARE ENGINEER

Lahore, Pakistan | muhammad.hasnain142002@gmail.com | +92-337-1671167 | LinkedIn: Muhammad Hasnain

SUMMARY

Full-Stack Web Engineer with hands-on experience building production-ready web applications using Next.js (React) on the frontend and Django on the backend. Skilled in authentication systems, role-based dashboards, e-commerce workflows, REST API integration, and responsive, maintainable UIs using Mantine UI and Tailwind CSS. Strong problem-solving, database design, and version control skills (Git/GitHub).

SKILLS

Frontend
Next.js (React)
Mantine UI
Tailwind CSS / Bootstrap
JavaScript (ES6+), HTML5, CSS3

Database & Backend Integration
MySQL
REST APIs
Node.js (supporting)

Tools & Infrastructure
Git / GitHub
MongoDB (supporting)

EDUCATION

University of Management and Technology **Aug 2021 - Jul 2025**

- Major in Computer Science.
- CGPA: 3.05

WORK EXPERIENCE

TechFoundry **Aug 2025 - Present**

- Built a scalable dashboard using Next.js 16 (App Router) + React 19, leveraging React Server Components (RSC) and Server Actions for faster page rendering.
- Optimized high-performance data grids with TanStack Table, implementing server-side filtering, sorting, and pagination for large datasets.

3Amigos **Jan 2025 - Mar 2025**

- Built a MERN stack search-based web application connected to a Microsoft SQL Server database with over 7 million records.
- Implemented backend optimization to enable high-performance search, delivering results within seconds.

K9 Technologies **Jul 2023 - Sep 2023**

- Integrated Vapi AI to build intelligent voice agents for automating call center operations, including designing and testing conversational flows with real-time simulations.
- Collaborated with the backend team to deploy voice agents and optimize real-time response handling in production environments.

PROJECTS

Integration of Price Comparison System, Visual Search **Jun 2025 - Jul 2025**

- Built visual search engine using Python backend + database storage (SQLite/MySQL) to retrieve products from uploaded images.
- Implemented price comparison module scraping competitor sites and matching products using Python-based fuzzy logic.
- Demonstrates frontend ↔ database ↔ workflow full-stack ability without Django.

Jadeed Gadgets - Ecommerce Platform **Mar 2025 - Jul 2025**

- Designed "Jadeed Gadgets," an AI-enhanced e-commerce platform using Django and SQLite, focused on electronics (laptops, accessories) with role-based access for Buyers, Sellers, and Admins.
- Implemented core e-commerce features including product filtering, wishlist/cart, seller dashboards, admin controls, and Cash on Delivery (COD) checkout, with custom session-based authentication.
